Department of Justice

With the job losses, Income losses for most citizens, Stock market down; it is time that when a settlement is reached, for it to be honored and the individuals who profit, who already have more income and assets than the average person stop prolonging the final settlement to enrich their pockets, get votes in their states, to hold offices that they are unable work and reach agreements with other government departments. Any system that can't reach an agreement is shorter time than this should refund their pay for ineffectiveness. People are losing faith in the over all government. The auto industry doesn't have compatible parts for interchanging with other autos, neither the appliance industry, or for that matter the human body. Every company tries to increase their market, look what your organization has allowed the Super Stores to do the small business person. Stop this delay now.
